REPORT ON LIMITED REVIEW OF CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

To the shareholders of VBARE Iberian Properties SOCIMI, S.A. at the request of the Board of Directors,

Introduction

We have reviewed the accompanying condensed consolidated interim financial statements (hereinafter, the interim financial statements) of VBARE Iberian Properties SOCIMI, S.A. (hereinafter, “the parent company”) and its subsidiaries (hereinafter, “the group”), which comprise the statement of financial position as at 31 March 2018, and the income statement, statement of comprehensive income, statement of changes in equity, statement of cash flows and related notes, all condensed and consolidated, for the three months period then ended. The parent company’s directors are responsible for the preparation of these interim financial statements in accordance with the requirements of International Accounting Standard (IAS) 34, “Interim Financial Reporting”, as adopted by the European Union, for the preparation of condensed interim financial information. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with legislation governing the audit practice in Spain and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim financial statements.

Conclusion

Based on our review, that cannot be considered as an audit, nothing has come to our attention that causes us to believe that the accompanying interim financial statements for the three months period ended 31 March 2018 have not been prepared, in all material respects, in accordance with the requirements of International Accounting Standard (IAS) 34, “Interim Financial Reporting”, as adopted by the European Union, for the preparation of condensed interim financial statements.

Emphasis of Matter

We draw attention to Note 2 of the accompanying interim financial statements, in which it is mentioned that these interim financial statements do not include all the information required of complete consolidated financial statements prepared in accordance with International Financial Reporting Standards, as adopted by the European Union, therefore the accompanying interim financial statements should be read together with the consolidated financial statements of the group for the year ended 31 December 2017. This matter does not modify our conclusion.

Valuation Process

Below is the cost and fair value of investment properties at 31 March 2018 and 31 December 2017:

	Euro Thousand			
	31 March 2018		31 December 2017	
	Cost	Fair value	Cost	Fair value
Investment properties (*)	18,888	30,781	17,720	28,542

Notes to the Interim Condensed Consolidated Financial Statements for the three-month period ended 31 March 2018

(*) The amount of cost and fair value as of March 31, 2018 of the previous table does not include 2,000 thousand euros corresponding to the purchased option of real estate investments

Gains recognized in the consolidated income statement on measuring investment property at fair value as of 31 March 2018 amount to Euro 1,071 Thousand (as of 31 March 2017: Euro 1,550 Thousand). According to IFRS 13, some situations may arise where transaction prices may not represent the fair value of an asset at initial recognition.

These investments have been valued following a market value approach, and these valuations have been performed by Aguirre Newman Valoraciones y Tasaciones, S.A.U., an independent expert firm in accordance with the provisions of the RICS Appraisal and Valuation Manual (the "Red Book") published by The Royal Institution of Chartered Surveyors based in England.

The market value is defined as the estimated amount for which an asset can be sold on a given market at the date of valuation between a seller and a willing buyer, being both reasonably knowledgeable about the asset, prudently, free of undue pressure to trade and assuming a reasonable time is given for completing the transaction.

Investment properties measured after initial recognition at fair value are grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1: Measurements derived from (unadjusted) quoted prices in active markets for identical assets or liabilities.
- Level 2: Measurements derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: Measurements derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (non-observable inputs).

The investment properties measured at fair value (without taking into account the purchase option in investment properties) as of 31 March 2018 and 31 December 2017 are as follows:

	Level 1	Level 2	Level 3
Investment properties	-	-	30,781
Total 31.03.2018	-	-	30,781
Investment properties	-	-	28,542
Total 31.12.2017	-	-	28,542

Methodology:

a) Comparable method:

The methodology used to calculate the fair value of the real estate investment properties which are not rented as of 31 March 2018 is the Comparable Method. This is based on the principle of replacement, meaning that we compare the asset with others whose value is already known. The greater the similarity, in terms of building type and location, the more reliable is the result.

The main variables affecting the market, and their relative weighting, have to be ascertained. This can be done directly or using a regression analysis applied to samples. The most commonly considered factors are: location, quality of the building, age, state of repair, standing of the neighbourhood, surface area, and suitability.

The comparable transactions would be sale/rental transactions in the area, the supply of comparable land/buildings and the opinions of other agents/experts. As a result, the value is determined by means of the identification of comparable properties for sale and closed transactions, which are comparable in terms of location as well as state of conservation and functionality. Regarding functionality, it has been assumed that the all properties are vacant and will be available for rent as the Company expects to receive all the permits in the short term.

Notes to the Interim Condensed Consolidated Financial Statements for the three-month period ended 31 March 2018

To obtain a reliable comparable, the first step is to standardize the market unitary prices obtained (comparable) based on a number of parameters such as surface, asset situation, quality/specifications of the asset, etc. and the second step is to weight these standardized values by the degree of similarity between assets being compared. These are considered the main factors or variables that determine variations of the specific market as its proper weight.

b) Discounted cash flows method:

The valuation methodology adopted in terms of determining fair value of currently rented properties is the discounted cash flows method with projected net operating income at 5 years and capitalizing the 6th year at an exit yield between 3.5% and 5.75% and using an Internal Rate of Return for discounting cash flows obtained between 5.25% and 7.25%.

The discounted cash flow method is based on predictions of the probable net income that will be generated by assets over a specific time period, taking into account the assets' residual value at the end of that period. Cash flows are discounted at an internal rate of return in order to arrive at the present net value. That internal rate of return is adjusted to reflect the risk associated with the investment and assumptions adopted.

Key variables are therefore net income, approximate residual value and internal rate of return.

Sensitivity analysis

Based on the simulations performed, the impact over fair value of investment properties of a 1% change in the internal rate of return would produce the following impacts as of 31 March 2018 and 31 December 2017:

	Euro thousand			
	Theoretical value			
	31 March 2018		31 December 2017	
	-1%	+1%	-1%	+1%
Valued using discounted cash flows method	29,883	31,885	27,745	29,671
Valued using comparable method	-	-	-	-
Fair value of investment properties	29,883	31,885	27,745	29,671

Commitments

The Group has no contractual commitments for the acquisition, construction or development of investment properties or in relation to repairs, maintenance or insurance.

Earnings per share (Euro)	0.35	0.76

b) **Diluted earnings per share:**

Diluted earnings per share are calculated by dividing net profit/(loss) of the period attributable to the owners of the Parent Company by the weighted average number of ordinary shares in the period, plus the weighted average number of shares which would be issued when converting all potentially diluting instruments.

For these purposes, they are considered dilutive instruments the ordinary shares presented under "advances capital" which have been issued at the close of each period.

The directors of the Parent Company have evaluated the effect of dilution of these potential shares and their potential impact on the calculation of earnings per share, and have concluded that its effect is not significant, and therefore basic and diluted earnings per share do not differ significantly.

The Group's financial debt is recognised at its amortised cost in the Consolidated Interim Statement of Financial Position

The abovementioned loan agreements contain certain covenants that are customary in the market for facilities of this nature, based on Loan to Value (LTV) and rental incomes over the asset mortgaged. Failure to meet these covenants represents an event of default and may result in, among other things, an acceleration of the loan's maturity and/or may trigger an early amortization event.

As of 31 March 2018, the Group is in full compliance with all terms, conditions, covenants and provisions of the financing agreements in place.

It is the Director's opinion that the abovementioned ratios are fulfilled at 31 March 2018, at the approval of these Interim Condensed Consolidated Financial Statements and that it will be also fulfilled in a year since then.
